

LearnEnglish Select

LearnEnglish Select is an online course developed by the British Council that helps job seekers and young professionals improve their workplace English and boost their career prospects.

LearnEnglish Select is a suite of six interactive self-access courses mapped to levels A1.1-B2 of the Common European Framework of Reference for Languages (CEFR).

Each level consists of 8 modules with 5 units, for a total of 40 self-study lessons. Study is self-paced and time taken to complete each level will vary according to the individual learner.

Level name	CEFR level	Hours of content
Beginner	A1.1	45
Elementary	A1.2	45
Pre-intermediate 1	A2.1	45
Pre-intermediate 2	A2.2	45
Intermediate	B1	55
Upper-intermediate	B2	55

With LearnEnglish Select, learners can:

- study on any web-enabled tablet or computer, when and where they choose
- consolidate learning by self-checking answers and repeating activities any number of times
- check learning with review units at the end of each module
- measure and track their progress throughout the course.

There is a suggested linear route through the course materials, offering learners a structured syllabus. This route is not enforced, however, and learners have the option to choose their own learning path.

Course materials focus on three different workplace contexts:

- Entering the workplace: writing job applications, preparing for an interview
- In the workplace: interacting in the workplace, meetings, presentations (including informal settings and socialising outside the workplace)
- Facing the public: describing products and services, interacting with partners, clients and customers.

Our methodology ensures a balance of activities and exercises to develop language structure, vocabulary and pronunciation as well as key skills. Content is not grammar-driven but instead offers functional language phrases and real, authentic workplace scenarios.

Video- and audio-based content featuring a range of accents is followed by interactive practice activities.

The course also includes regular tutor videos, which help to guide learners through the materials and explain key language and grammar points.
